INTERNATIONAL PROGRAMS

The University of Kansas

The University of Kansas has welcomed over 150 students from the Brazil Scientific Mobility Program (BSMP). BSMP provides undergraduate and graduate students in STEM fields with the opportunity to study abroad at top-tier American universities.

[KU's Sponsored and Visiting Student Program](#) provides BSMP students with support, guidance, and development opportunities in and out of the classroom. The KU program, created in 2012, serves as the central point of contact for over 560 sponsored students from around the world and 40 funding organizations.

After their year at KU, BSMP students return home to complete their degrees. They go back to Brazil with new language skills, knowledge in their major, and a fondness for a certain bird.

"Studying at the University of Kansas was an excellent experience. While living in Lawrence, I could get involved in cultural and educational activities. The professors are accessible, and the advisors support the students in everything they need," said BSMP student Raphaella Ingrid Santana Oliveira.
