The University of Kansas

*In 2015, Mary Klayder led her 39th study abroad trip. The beloved University Honors lecturer has taken more than 850 KU students to the United Kingdom and Costa Rica.*

*Her London Review course allows students to plan and research their Spring Break trip. In addition to researching performances and exhibits in London, students study the genre of the literary/arts review.*

*Upon their return, students spend the remainder of the semester publishing [The London Review](#). Each student is responsible both for writing reviews and for helping to put together the journal.*

*“My experience in London was truly eye-opening and wonderful. I learned to navigate, explore, and understand a metropolis,” said Saran Davaajargal, who participated in the 2014 London Review. “Traveling with Dr. Klayder was amazing as she knew the best places to go in London. Her words ‘it will be fine’ kept the travel stresses away.”*
